Instruments & Systems

A Leading Manufacturer of Control Valves & Process Control Instruments

INSTRUMENTS & SYSTEMS

A Leading Manufacturer of Control Valves & Process Control Instruments

Engineered for reliability in critical process industries since 1985.

INSTRUMENTS & SYSTEMS

Established in 1985, Instruments & Systems is a manufacturer of control valves and process control instruments for critical industrial applications across global process industries.

The company's portfolio includes control valves, pressure and level transmitters, flow measurement instruments, and intelligent electric actuators designed for reliable performance in demanding operating environments.

Serving sectors such as power, oil & gas, chemical, petrochemical, steel, sugar, and paper, Instruments & Systems focuses on delivering dependable process control solutions aligned with modern industrial requirements.

ENGINEERING & MANUFACTURING FOCUS

With a strong focus on engineering precision and process reliability, Instruments & Systems manufactures solutions designed for high-performance industrial environments where operational consistency and dependable control are critical.

CORE CAPABILITIES

Delivering integrated solutions across process control, industrial instrumentation, flow measurement, and intelligent actuation systems for critical process industries.

Process Control Valves

Engineered flow control solutions for demanding industrial process applications.

Level Measurement Solutions

Industrial level monitoring instruments for continuous and dependable measurement.

Pressure, Temperature & Differential Pressure Measurement

Precision transmitters engineered for accurate and stable process monitoring across critical industrial applications.

Intelligent Electric Actuation

Advanced electric actuators for precise and efficient valve automation.

Flow Measurement Systems

Reliable flow measurement solutions for process efficiency and operational control.

Industrial Process Instrumentation

Integrated instrumentation solutions supporting modern process control environments.

PRODUCT PORTFOLIO

Engineered process control solutions for critical industrial applications.

01 iPTrans PROCESS CONTROL INSTRUMENTS

Comprehensive process measurement solutions engineered for accurate monitoring, stable performance, and dependable industrial operation across demanding process environments.

- Pressure Transmitters
- Pencil Type Pressure Transmitters
- Differential Pressure Transmitters
- Temperature Transmitters
- Hydrostatic Level Transmitters
- DPT Type Level Transmitters
- Remote Seal Pressure Transmitters
- Remote Seal Differential Pressure Transmitters
- Ultrasonic Level Transmitters
- Radar Level Transmitters
- Smart Submersible Level Transmitters
- Non-Smart Submersible Level Transmitters
- Steam Flow Meters
- Electromagnetic Flow Meters

High Accuracy Precise & Reliable

Robust Design Built to last

Wide Range for every process

Proven Performace In demanding Indusries

02 CONTROL VALVES & INTELLIGENT ELECTRIC ACTUATORS

Engineered flow control and intelligent valve automation solutions designed to deliver accurate process regulation, dependable operation, and enhanced control across critical industrial applications.

- Globe Control Valves
- Ball Control Valves
- Butterfly Control Valves
- Knife Edge Gate Control Valves
- Iris Valves
- inTork Intelligent Multi-Turn Electric Actuators

03 SPECIALIZED SOLUTIONS FOR THE SUGAR INDUSTRY

Enhancing process consistency, sugar quality, recovery efficiency, and plant automation.

- Auto Feed Pan Boiling System
- Conductivity Transmitter
- Lime Dosing Unit

INDUSTRIES SERVED

Sugar & Distilleries

- Balrampur Chini Mills Limited
- Magadh Sugar & Energy Ltd
- Carlsberg
- Dalmia Bharat

Pulp & Paper

- bilt
- DEV PRIYA PAPERS PVT. LTD.
- Kuantum Papers
- NAINI

Cement & Steel

- NALCO
- UltraTech Cement
- JSW Cement
- JSW Steel

Power

- BHEL
- DVC Damodar Valley Corporation
- GVK
- NTPC

Oil & Gas

- HP
- IndianOil
- ONGC
- MRPL

...and various other continuous process industries.

MANUFACTURING & QUALITY ASSURANCE

Structured manufacturing, precision assembly, and controlled testing processes designed to ensure dependable industrial performance.

MANUFACTURING WORKFLOW OVERVIEW

01 Raw Material Storage

02 Machining

03 Surface Finishing & Painting

04 Finishes Child Part Storage

05 Mechanical Assembly

ASSEMBLY, TESTING & VALIDATION

01 Electronic & Instrument Assembly

02 Testing & Calibration

03 Ageing & Inspection

04 Finished Product Verification

05 Packaging & Dispatch Preparation

Instruments & Systems

A Leading Manufacturer of Control Valves & Process Control Instruments
