

The integral flow assembly shall be supplied as an integral assembly consisting of upstream and downstream straight pipes, the integral orifice of 316 SS (as a minimum), and transmitter installed along with manifold. End flanges shall be as per piping specifications. Upstream and downstream pipes shall be honed from inside to achieve a smooth surface. Integral orifice meters, when used, shall be installed with block and bypass valves.

Specifications

Pipe Size	15 NB to 500 NB
Class	#150, #300, #600
Design Standard	BS 1042, ISO 5147, ASME, AGA, R.W. Miller Etc.
Pipe/Flange Material	Carbon Steel, Stainless Steel, Alloy Steel, Hastelloy, Titanium, Monel Etc.
Types	Square Edge, Eccentric, Quarter Circle, Conical, Multi Hole Etc.
Mounting Type	Flange, Butt welded in pipe
Typical Applications	Gases, Liquids, Steam
