

This **ultrasonic level transmitter** contains a number of patented technologies, which are safe, clean, high precision, long service life, stability and reliability, easy to install and maintain and other characteristics. It is suitable for acid, alkali, salt, anti-corrosion, high temperature and other fields.

This instrument can be connected to display tables or various DCS systems through 4~20 mA or RS485 (Modbus protocol or other customized protocols) to provide real-time liquid level data for industrial automation operation.

Specifications

Measuring Range	0~15m (selected according to the actual measured mileage)
Blind Spot	0.35 m ~ 0.6 m
Ranging Accuracy	0.5% (standard conditions)
Range Measurement Resolution	1 mm
Pressure	Below 4 atmospheres
The Instrument Shows	Self-contained LCD display liquid level or spatial distance
Analog Output	4~20 mA
Digital Output	4-20 mA, RS-485 + two switching quantities
Power Supply Voltage	DC24V / AC220V (Built-in lightning protection device)
Ambient Temperature	-20°C ~ +60°C
Protection Level	IP 65
